

RailSight: Complete Shipment Visibility

High-Quality Data, Complete Visibility

Railinc is the industry hub for rail data and IT solutions. With RailSight Track and Trace you'll have complete shipment visibility, enhanced with a broad array of data elements, including ETAs, Standard Point Location Code and waybill information, and more.

Near real-time data sent around the clock

Tracking intermodal equipment and railcars on more than 560 rail carriers across North America

Reduce Costs, Increase Margins

Fleet management with RailSight Track and Trace pays off, enabling cost reductions and cost avoidance and helping you squeeze even more out of your supply chain. Here are just a few of the ways connecting your TMS with RailSight Track and Trace can help you cut costs:

- Reduce storage and demurrage charges and other costs
- Decrease bad order and expedited shipment costs
- Improve efficiency by removing the need to query multiple websites
- Focus IT resources on supporting your core business
- Gain support for disputed fees and improve billing

Enhanced Productivity and Performance

Instant, accurate and complete insight into the status of shipments translates into improved asset allocation and planning, better inventory management and reduced costs. Your business decisions are only as good as the data supporting them.

11m

More than 11 million events processed each day

Single source for largest aggregation of rail data

Flexible Systems Integration

As your single-source solution, RailSight Track and Trace provides many connectivity choices, from legacy systems to the latest API solutions. It easily integrates with your TMS and leverages essential Railinc products like the Umler system to deliver the most complete rail data management solution available.
